XT-3815
Fanless POS Terminal

POSIFLEX

POSIFLEX

In today's retail and hospitality market, POS terminal is no longer just a cold and hard business tool. It is a part of the store decoration, a part of the store image. Each curve and detail of the POS terminal should add something to the overall mood of the store, to lift the shopping experience of the customers.

XT-3815 is the new Bay Trail based fanless terminal in the XT family. It is positioned to slot in, performance wise, between XT-3015/3215 running Lntel D525 CPU and XT-5315 running Intel Celeron CPU

Looks
Slimmer and sexier than ever, XT Series is a sharp departure from the traditionally more conservative Posiflex terminal design. Every curves and details are carefully thought out to make XT Series one of the most visually desirable terminals in the market.

Flexibility
XT-3815 comes with the selection of two foldable bases, the curvy slim GEN7E Base and the larger but practical GEN8E Base. (U.S Patent 9004436)

The new foldable bases allow XT-3815 to be configured into different configurations. "Flat Folded Mode" to save the shipping package volume. "Low Profile Mode" to allow greater interaction between cashier and the customers; and the traditional "Full Extended Mode". All this can be achieved with a simple pull of the hidden lever. This one terminal/multi-configurations concept provides unmatched flexibility to store owners and system integrators alike.

Full Extended Mode   Low Profile Mode   Flat Folded Mode

Performance
XT-3815 is equipped with the latest Intel Bay Trail quad core processor that is powerful enough to process anything thrown at it without even breaking a sweat.

Fanless Design
Fanless architecture of XT-3815 allows it to run on harsh environments, such as greasy kitchen, without ever worrying about the fan maintenance. It also allows the machine to run quietly, which is ideally suited for the high-end boutique stores or hospital environment.

GEN8E Base
Optional GEN8E Base that integrates internal power adaptor and PoweredUSB port into the base stand, which allows for clutter free counter.
